Is it possible to live in a house on four wheels? What does it have in common with dogs? The answer for this question is easy for **Ania Przewidowska - the woman whose life has changed in one year.** She got sick in 2016, she lost her money, house and the rest of her goods, but she had a lot of power and one day she found a new way for her life.

„My life has become the great journey”- Ania says about her new lifestyle.

Five years ago she was working as an actress in many theatres. She acted in films and some sitcoms as well. In 2016 she had a cancer so she needed a surgery and chemotherapy. Her treatment was extremely expensive. She had no money so she decided to sell her house, her car and everything she owned. It was worth it! After 4 months of her healing she finally **”killed the monster”** and now she is cancer free. She says that she was born once again and that is why she decided to change her life. The rest of her money she spent on a recreational vehicle and she started travelling.

„Thanks to my house on four wheels my life has no limits”- says Anna. **„I have my kitchen there, bedroom that I love and even a bathroom”.** When she was travelling in Italy something really scary happened. One night she heard some dogs- they were trapped. Ania helped them and took them to her home. Since then they were inseparable.

Anna created a place for people who loved travels and animals. It is some kind of a caravan park where people live and take care of abandoned dogs. Living

in the house on four wheels has become for them a philosophy of their lives, with giving help.

Anna's house is in the centre of a campsite and above the entrance there hangs the inscription **„House on Four Wheels – DogCamper”.**

Happy animals have here own little campers, which their owners built for them. The land of houses on four wheels has become a gorgeous tourists attraction. **„Come here to Us and begin a really happy life in the house on four wheels!”-** Ania invites.
